PROJECTS

MindTalk

- MindTalks is committed to making mental health resources accessible to all, offering expert advice, counseling, community support, and self-help tools. We empower individuals to take control of their mental well-being through connection and understanding.
- **Technology:** NextJS, NodeJS, MongoDB
- **Project Link:** <https://mindtalks.in>
- <https://partner.mindtalks.in>

Ambaram

- Ambaram provides a secure, cloud-based collaboration platform tailored for the fashion industry, enabling designers and agencies to share data, collaborate in real-time, and streamline workflows from any location. It enhances efficiency and creativity, bringing traditional design studio processes into an enterprise-grade environment.
- **Technology :** ReactJS, NodeJS, MongoDB
- **Project Link :** <https://app.ambaram.ai/>
- <https://admin.ambaram.ai>

Transportation

- This project offers a transport service where users can request goods transportation and track drivers in real-time. Drivers can accept or decline requests, with both parties accessing relevant details for smooth communication and efficient logistics management.
- **Technology :** ReactJS
- **Project Link :** <https://transportalotodo.com/>

Tour And Travel

- The Tour and Travel project specializes in hotel bookings for tourism, offering detailed information on various properties. It showcases hotel locations ideal for tours, along with comprehensive room specifications, including amenities, pricing, and availability. This ensures travelers can easily find and book the perfect room to suit their needs, enhancing their overall travel experience.
- **Technology:** ReactJS, Nodejs, MongoDB
- **Project Link :** <http://visitmu.codestarc.com/#>

Spendable

- This project empowers individuals with disabilities by allowing them to hire trusted guardians for essential tasks like purchasing and official work, while securely managing records to ensure transparency. It enhances users' independence and quality of life.
- **Technology:** ReactJS, Nodejs, MongoDB
